Europarc Security

Ecoware

Europarc Security

The team at Europarc has over 30 years experience when it comes to security.

Domestically, Europarc has been in partnership with many local authorities and corporate companies, in fact the most recent installation was to supply the Magistrates Court's Service with the very latest in CCTV technology (over 60 courts in total). On the international sector Europarc has recently used its expertise to help and advise BSN Medical Group, Mexico.

Europarc needed a secure, flexible & fast computing solution for their gatehouses to run streaming digital media & yet act as normal PCs displaying live images from over 40 separate cameras. Space was a factor so they examined all alternatives before turning to Multi-seat computers. Commenting on the installation Sales Director Mark Flodman stated that power, heat & space savings were the instrumental factors in choosing MiniFrame UK's Ecoware powered solution.

Going one step further he commented that "With us protecting sites for high profile client like Her Majesty's Court Service (HMCS) and Subway we needed to be assured that with 1 PC running several workstations we wouldn't lose the ability to fully secure our clients' premises. However we totally forgot we had installed Ecoware in a way, because it's just been working as we wanted it to with the guards able to do everything they could before but faster and in a more pleasant working environment. The paradox has been that Ecoware allowed us to design and equip gatehouses with better facilities in a more pleasant atmosphere at reduced cost."

Ecoware

Europarc Security

The fundamental principal in which we have built our business is to deliver security solutions that operate to each of our customer's requirements, whilst at the same time exceeding the expectations with the standards and quality of our service and equipment.

"We are sensitive to the critical importance of the products and services provided to our clients, ensuring that their installation and maintenance regimes are carried out with discretion and minimal possible disruption, Ecoware has helped considerably with this

maintenance requirement as we have fewer boxes to maintain."

Europarc Security are providing round the clock services for many of the UK's largest companies
